Profile

3 Years of experience in Software Quality Assurance, proficient in testing on Client/Server and Web-based applications. Extensive working experience on all phases of Software Development Life Cycle (SDLC), its methodologies Such as Agile-SCRUM .

Employment History

Software Quality Analyst, Persistent Systems Limited

OCTOBER 2019

Certification:

Udemy : Selenium WebDriver with Java -Basics to Advanced+Frameworks

<https://www.udemy.com/certificate/UC-aafc58b0-bce5-4c95-bfa2-a707ccf0fcc1>

Education

Bachelor in Engineering, Shivaji University

Master in Engineering, Punyashlok Ahilyadevi Holkar University, Solapur

Software Testing Skills

- Proficient in Manual Testing from Test Design to Test Summary Reports.
- Good knowledge of Software Development Life Cycle (SDLC).
- Excellent understanding of Defect Life Cycle, Defect Reporting.
- Experience in designing, implementing and maintaining automated test scripts using Maven, TestNG, POM classes and git.
- Hands on experience on Project management tool JIRA.).
- Experienced in all phases of Software Testing Lifecycle (STLC) with expertise in the Sanity Testing, Functional Testing, Regression Testing, Retesting, Database Testing.
- Good expertise in Core JAVA, OOPS Concept, Strings, Collections, Exception Handling.
- Experience in writing SQL Queries against database for data verification. Strong experience in Database.
- As a Test professional participated in Scrum Meetings to discuss the Test status report.
- Design the Traceability Matrix to map Business Requirements with test Cases,
- Conduct test Case review and send the reviews comments to team mates,
- Generate test summary report.
- Strong background in manual testing, with the ability to plan, design, and execute test cases.
- Strong and professional work ethics and time management skills to deliver results and meet challenging deadlines.
- Experience in Web Application Testing .
- Experience in test planning, test strategy, estimation, scheduling and closure.
- Extensive experience in test design and execution.
- Experience in defect logging, management and tracking.
- In-depth knowledge of SDLC and STLC phases and testing methodologies, processes
- Expertise in designing, writing and executing the test cases and decision tables.
- Experience working in an Agile / Scrum development process.
- Hands-on experience with automated testing tools.
- Hands-on experience with black box testing.
- Proven work experience in software quality assurance.
- Proven work experience in software development.
- Strong knowledge of software QA methodologies, tools and processes.

- Experience in writing clear, concise and comprehensive test cases.
 - a Solid knowledge of SQL and scripting in JAVA.
 - Experience on Selenium Web Driver, creating Scripts in selenium. Exposure to Web Services, REST, API Testing.
 - Always coordinating and communicating with developers and project owner for better understanding of functional and technical requirements to increase product quality
 - Designing and executing test cases to ensure that business requirements and functional specifications are tested and fulfilled.
 - Good knowledge in API testing
 - Strong verbal and written communication, interpersonal, decision-making, problem solving and customer services skills.
-
- Expertise in designing, writing and executing the test cases
-
- Ability to interact with clients and manage client expectations also have good coordination, inter-personal communication.

Project Details

Project name : The Range

Role and Responsibility:

- Understand the Sprint documents and analyse the requirement.
 - Prepare the test case.
 - Execute the test case to validate customer requirement
 - Involved in review test case and send review comments to colleagues.
 - Prepared mapping sheet of SRS/requirements and test case
 - Everyday sent test report to Project lead.
 - Write test cases in excel sheet and perform Execution of test cases.
 - Identification of defects, registering them in JIRA and reporting them to the onsite lead.
 - Performing Functional Testing, Regression Testing and Re-Testing.
 - Validation of Expected output vs Actual output in respective database tables using **SQL**.
 - Preparing transition document for other team members.
 - Active participation in daily status calls with the client.
 - Identify the test cases for **Automation**.
 - Designing **POM Classes and Test** Classes
 - Participate in scrum meeting to discuss about project progress report every day.
- Log the defect using defect management tool JIRA.

Declaration

I hereby declare that the above written particulars are true to the best of my knowledge and belief.
